EV Charging

ANDERSEN

# The Pinnacle of Electric Vehicle Charging

We are passionate about driving electric. There's much more to the experience than the satisfaction of an ethical choice. It's the silent power. The low running costs. The pioneering technology. More than a new way to drive, it feels like a new way to live.

We're Andersen, the UK's only design-led EV charging brand. We wanted more out of the tools that power electric vehicles. Our product is more. More beautiful, more refined, more efficient. Andersen charge points come with an industry-leading seven year warranty, over 200 colour & finish combinations, energy tariff & solar integration and convenience lighting for ease of use.

**7-year warranty**

# Prestige Partnerships

At Andersen EV, we believe in the power of partnerships to drive excellence as well as innovation. Our partnerships, with leading companies within their fields, reflect our dedication to providing a pinnacle charging solution. Our range of bespoke charge points are the perfect blend of sophisticated design and cutting-edge technology, enhancing both the functionality and aesthetics of your home. Traits we are proud to share with our OEM and brand partners.

We proudly partner with elite brands such as Jaguar, Land Rover, and Porsche GB. Together we are able to deliver a seamless charging experience which compliments your home and the performance of your vehicle.

Another partner of Andersen's is pioneering design company, Callum Designs. The name behind the design of the first fully electric Jaguar, the I-Pace, we are

able to once again compliment both smart functionality with a strong design-led focus. This partnership ensures that our charge points continue to be aesthetically pleasing while blending or standing out harmoniously with any home exterior.

Andersen EV also partner with Classic car restorers and EV converters, Electrogenic and Everrati. Driving innovation together, we have partnered with these two companies as a testament to our dedication to excellence and sustainability. Our bespoke home charging solutions support both Electrogenic and Everrati on their mission to bring timeless classics into the electric era, offering a unique and prestige combination of heritage and the contemporary.

# Our Service

Customer experience is paramount to the Andersen brand, and a lifetime Concierge Service enhances customer trust in the brand and its products.

Here at Andersen we believe that the quality of our service should match the quality of our charge points.

Our status as a Which? Trusted Trader, as well as over 800 5-star reviews on Trustpilot are testament to our dedication to the highest levels of service at all stages of your Andersen journey.

Our consultation service allows you to ask the questions you need to before purchasing. Our unique, nationwide, in-house, EV-driving electricians are fully trained to the highest standard, allowing you to have complete confidence in our service and your installation.

Upon purchase of your Andersen home charge point, you will gain access to a lifetime concierge service in order to help with any queries you have, from tariff advice through to how to get the most out of your EV, at any time while you use your Andersen charger. Our unique 7-year warranty, the longest on the market, gives you complete confidence that you've bought a product that's built to last.

# The Andersen App

## Simplified Setup

New Andersen users can simply add their vehicle, charge point & energy tariff to start benefiting from the features of the all-new Andersen app.

## Estimated mileage added

You will benefit from being able to view the estimated miles added to your car following a charge session, based on the average consumption of the make and model of your vehicle. You can add your vehicle to the Andersen App, within Settings. Additionally, you will be able to view the duration of charge sessions, and the cost of them, based on your energy tariff settings within the app. These can be added to your account, either during the setting up of the app or later on in Settings.

## App Notifications

For ultimate convenience, the Andersen App allows you to control whether you receive push notifications, email notifications or both. With this ability to take control of your app notifications, new users have the option to choose to receive notifications on a weekly charging report, device online status, error messages, and the start and end of charge sessions.

## Overview Page

Once the setup of your Andersen App is complete, you will be able to instantly see your charging status with clearly displayed information. The live breakdown of your charge session includes information such as the duration of a charge session, the cost of your charge session and the amount of energy used. You will have additional useful functions such as the ability to remotely lock your charge point for security and to charge outside of scheduled times. Your bespoke charge point colour combination will be represented on this screen.

## Scheduled Charging & Charge History Reporting

With the ability to integrate your electricity tariff, you can schedule your charges to coincide with your low cost or off-peak tariff. This can be done easily from the Schedule page in the Andersen App. Charging history allows you to easily view all previous charging data in one place. Here you can view the cost of your charge sessions, the amount of grid or solar energy used as well as the duration of each charge session.

# Promotions, Rewards & Payment Methods

## Upgrade Service

Replace your current EV charge point with a premium Andersen unit. As part of our upgrade package, we will install your new, bespoke charge point at no cost\*, plus we'll responsibly dispose of your old unit, too.

## Refer a Friend to Andersen

If you're spreading the word about Andersen, we want you to be rewarded. The Andersen Referral Programme allows you and a friend to benefit from £75 each.

## Payment Options

Purchase your Andersen EV charge point in a way that suits you. You can pay in full. You can also pay with Andersen Easy Pay or PayPal Pay in 3, where you can pay over 36 months or pay in three interest-free payments.

\*All upgrade offers are subject to Andersen carrying out a survey on your property to establish the complexity of the installation. You may incur additional costs, dependent on the results of your survey & whether additional preparation is needed.

# Design harmony for every home.

At Andersen EV, our bespoke home charge points are designed to blend seamlessly with any architectural style. Whether you live in a period property, a contemporary home, a charming farmhouse, or a stylish townhouse, Andersen charge points are designed to compliment your home's aesthetic and kerb appeal.

Choose from over 200 combinations as standard or the option to colour match by RAL code to perfectly match your homes exterior. From a timeless Alpine White and Pebble Grey to Highland Green or Hampton Stone, there is a shade for every taste.

Our charge points feature unique hidden charging cables as standard for easy and stylish storage. Whether mounted on brick, timber, or modern render, the Andersen product range integrates effortlessly without compromising style.

All Andersen products feature a modular design. This means it has never been easier to replace the fascia of your charge point. If you decide to renovate or change the colour of your home in the future, or move property, you have the ability to change the fascia of your unit with ease.
