Women's health impacts business

4 in 10

may leave work due to menopause.

9 in 10

with reproductive health issues face mental health challenges.

8 in 10

new parents struggle with returning to work.

87% of working women want their employer to be more supportive when it comes to women's health.

A valuable investment in your people.

Fosters inclusivity

Championing women's health in the workplace empowers your team by addressing their unique needs and promoting equal opportunities for all.

Attract and retain people

Our personalised support enhances employee health and wellbeing, leading to higher job satisfaction and improved retention rates.

Builds employer value

Demonstrate your commitment to employee wellbeing with Anya, and elevate the quality of your hiring pool.

Addresses burnout

24/7 women's health support reduces burnout risk through immediate, effective intervention when they need it most.

Dr Chen Mao Davies

Designed with every woman's health journey in mind, award-winning Anya was inspired by Founder, Dr. Chen Mao Davies. Award-winning R&D specialist turned entrepreneur, Chen is committed to supporting others, through struggles she faced herself.

How Anya supports millions, from 100+ countries.

24/7 AI-powered companion

Combining evidence-based AI conversations and expert support to provide personalised healthcare and companionship 24/7.

Private video consultation & chat

Private consultations and messaging lets users connect directly with specialists for compassionate healthcare advice.

Personalised content & programmes

Our AI uses data insights to offer personalised content and programme recommendations based on user needs.

Virtual communities

Offering a supportive network where users facing similar situations can connect and share compassion.

“Anya's support has made a real difference for our people, solidifying its reputation as an indispensable asset in our employee benefits package.”

Louise Jones
Chief People Officer, Clearscore

Trusted by the NHS

Pioneering hybrid AI technology written by human healthcare specialists.
